Search Notes

Re: 10/383,068 US 5,739,667

Attached are search results.

**No U. S. litigation was found in searches of
Lexis-Nexis and Questel-Orbit databases.**

**If more searching or explanation is needed, please let
me know.**

**Thanks,
Darcy Bates**

STG - (A) United States patent
AB - A control system for charging enabling efficient charging of
rechargeable batteries in an electronic apparatus which charges
its rechargeable batteries by using a charger circuit when driving
the apparatus by using an external power source,, including first
detecting unit for detecting a differential value between a
maximum permissible charging current allowed by the rechargeable
batteries and a charging current flowing to the rechargeable
batteries; second detecting unit for detecting a maximum usable
current by detecting a differential value between a maximum
supplyable current allowed by the external power source and the
current consumption of the apparatus; third detecting unit for
detecting a differential value between a maximum useable current
and the charging current flowing to the rechargeable batteries;
and control unit for controlling the system in accordance with the
differential values detected by the first and third detecting
units so that the charger circuit generates the maximum charging
current within the range where the charging current flowing to the
rechargeable batteries does not exceed either of the maximum
permissible charging current and the maximum useable current.
